- j) O código de estado HTTP foi 304 e a frase foi Not Modified. O servidor não retornou o conteúdo do arquivo, porque na segunda requisição GET, o navegador inclui o cabeçalho if-modified-since: ..., informando que já possuía uma versão do arquivo salva em cache, o servidor verificou essa data e concluiu que o arquivo não foi modificado, por isso, ele respondeu com o código 304 not modified, fazendo que o navegador possa continuar usando sem precisar baixar novamente.
